Projects

Quiz Craft | Cyberonix Consulting | **Aug 2024 - Present**

Tools: PHP, Laravel, jQuery, JavaScript, Bootstrap, AJAX, MySQL

Quiz Craft is a web-based application designed to streamline quiz creation and management. In this project, the admin can create brands and their types, followed by questions of various formats, such as text-based answers, numerical responses, and multiple-choice options. Admins can then generate shareable links for the quizzes, which users can access after providing their name and email. Users can attempt quizzes in real time, with immediate results displayed. Admins have access to real-time reports on user performance and test records. This system efficiently manages and tracks quiz interactions for both users and administrators.
